# Google slides

---

---

# INTRODUCTION

- Google Slides is a presentation program included as part of the free, web-based Google Docs Editors suite offered by Google. The service also includes Google Docs, Google Sheets, Google Drawings, Google Forms, Google Sites, and Google Keep.
- The initial release of google is almost 16 years ago in march 9,2006
- Slides serves as a collaborative tool for cooperative editing of presentations in real-time. Presentations can be shared, opened, and edited by multiple users simultaneously and users are able to see slide-by-slide and character-by-character changes as other collaborators make edits
- Google Slides is available as a web application supported on Google Chrome, Mozilla Firefox, Internet Explorer, Microsoft Edge, and Apple Safari web browsers.<sup>[11]</sup> Users can access presentations, as well as other files, through the Google Drive website.

# WORKING OF SLIDES

To create a new presentation:

1. Open the Slides home screen at [slides.google.com](https://slides.google.com).
2. On the top left, under "Start a new presentation," click New.
3. Edit background and theme of the presentation.
4. Insert images and video and audio files.
5. Add animation to your slides to spice up your presentation.

## For Online learning

- One of the best feature of the google slides to directly present the presentation to meet through the present button.
- Slideshow button to show the presentation.
- You also share your ppt and let others edit it though share feature.
- Comment feature to let the viewers comment on your slides.
- Offline feature for those who need it.

**THANK YOU**
